# Literature Management with Endnote

Stephanie Hofmann & Bobby Neuhold

# Accelerate your research

EndNote is a reference manager that helps you save time formatting citations, so you can focus on your research.

# Why Literature Management & Software?

#### **Literature / Information Sources**

- Books & book chapters
- Articles in journals & newspapers
- Conference proceedings
- Web pages
- Databases
- Software
- o Images, audio & video, ...

by Meghan Dougherty, www.flickr.com, CC BY-SA 2.0

#### Managing

- File, organise & update references (author, title, year...) and corresponding media (articles, books, ...)
- Aim: a personal library for quick information retrieval & usage

#### **Advantages of dedicated software**

- Import, edit, organise, sort and retrieve metadata
   & media
- Access library via
  - o Desktop & Laptop
  - o Web
  - Smartphone & tablet
- Share content with colleagues
- Use library for the writing of reports, articles, theses
  - o cite references in your text
  - o generate bibliographies
  - select / change output styles according to the requirements

# **Reference Management Software – Features**

#### **Essential**

- Add metadata & PDFs
  - o Import bibliographic information from databases & publishers
  - Add & edit manually
- Organise references
  - Type (eg article, book, ...)
  - Metadata (authors, title, ...)
  - Personal groups / folders
  - Sort, search, tag, ...
- Find duplicates
- Read & annotate PDFs
- Cite references & create bibliographies in your word processor using various (editable) styles

### Recommended

- Built-in online search with (semi)-automatic import of references incl. PDFs
- Access from everywhere
  - o PC, Mac, ...
  - o Online / Web
  - o iOS / Android
- Share & collaborate
- Import / export metadata (& PDFs) from / to other reference management software
- 0 ...

# **Create a New EndNote Library**

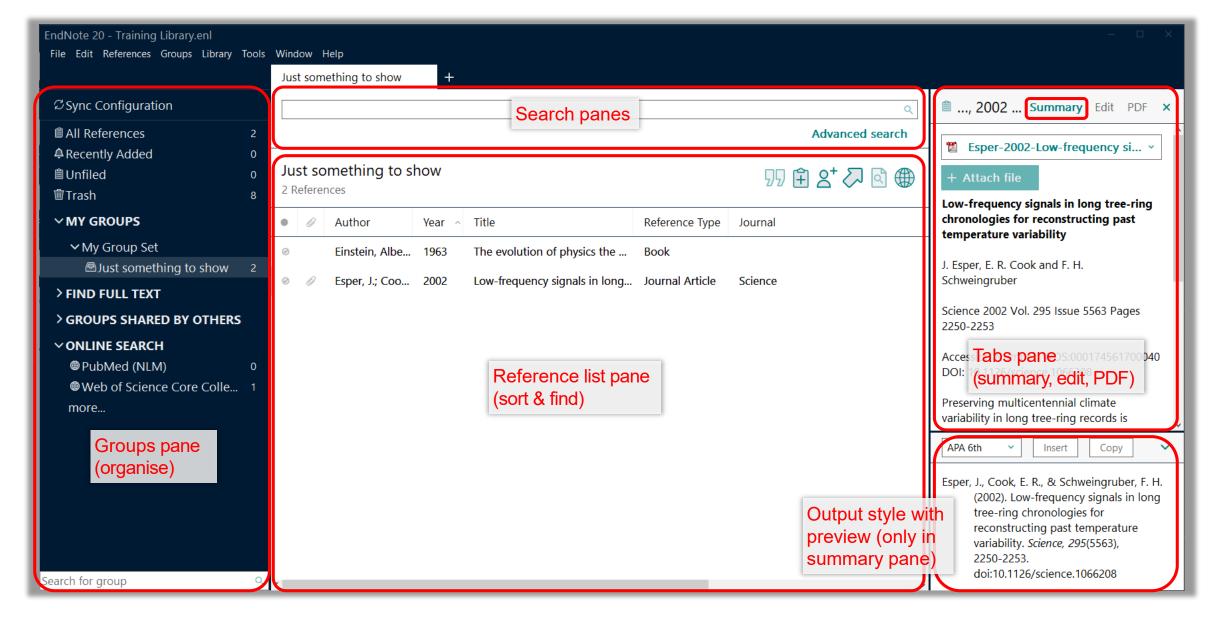

- Tip: EndNote generates an \*.ENL file and a \*.DATA folder that need to stay together.
- Tip: While the \*.ENL file is the library with all metadata, the \*.DATA folder is the default location for attachments and also contains library related indexing files.

When EN opens for the first time a welcome screen might ask you to setup an online account. There is no need to do this now. Just create a new or open an existing library via the <File> menu.

 Tip: Citations for book chapters are often best obtained via the publisher's website

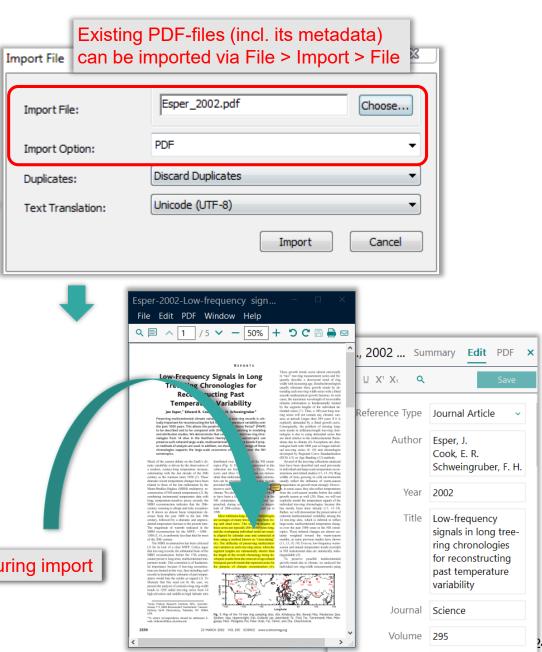

## **Collect Metadata – Extract Metadata from PDFs**

- Tip: PDF-file renaming can also be done later, even as a batch, via References > File
  Attachments > Rename PDFs
- Tip: DOI needs to be present to allow for the extraction of metadata from PDFs

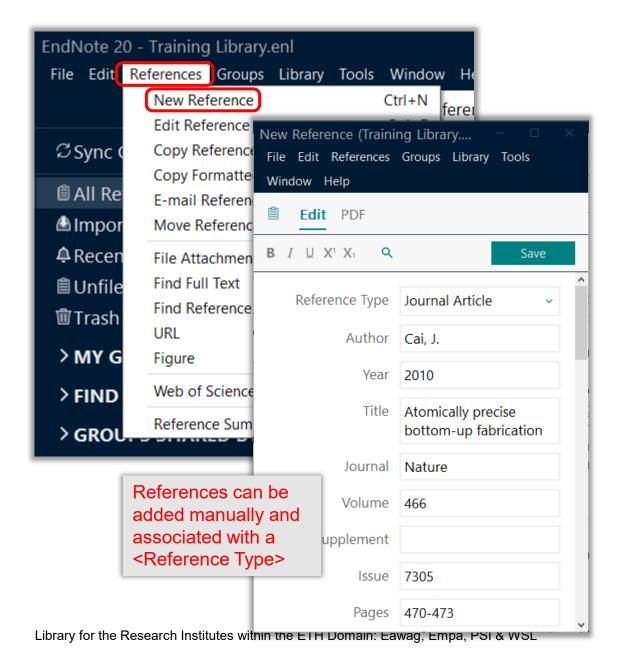

Existing PDF annotations are kept during import

### **Collect Metadata – Manual Addition of references**

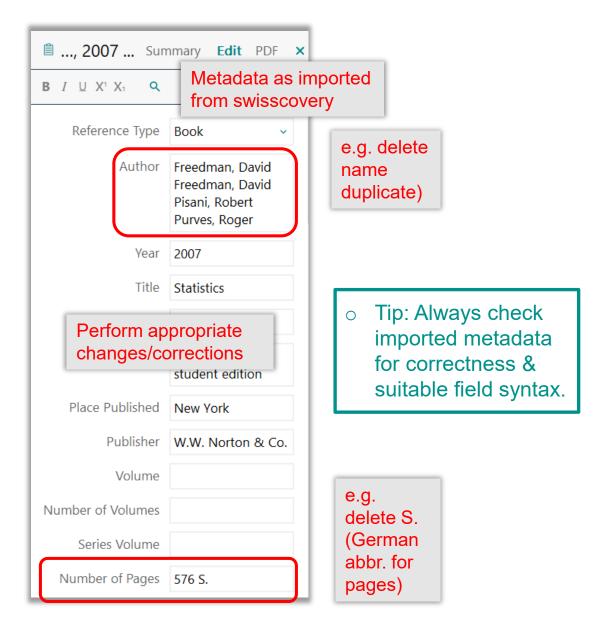

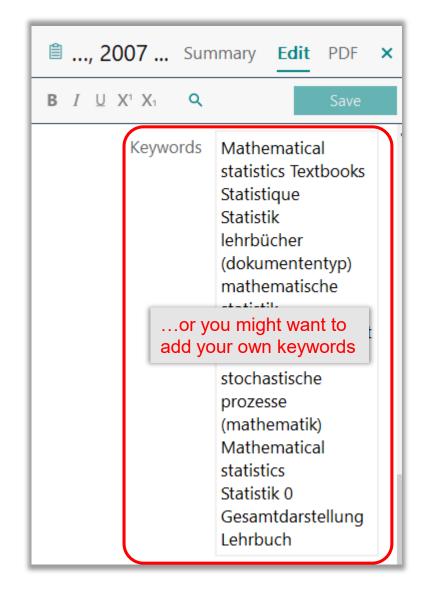

- For the manual addition of references you need to obey a certain syntax and rules regarding the input of the metadata into the respective fields
- Rules are pretty straightforward and their effect (for a given output style) can be seen in the bottom section of the summary tab
- Tip: Compare your syntax with some already existing (imported) references of the same reference type
- Tip: EN's built-in Help index (F1) gives advice on entering references manually

**Organising your Library – Grouping References** 

Endnote

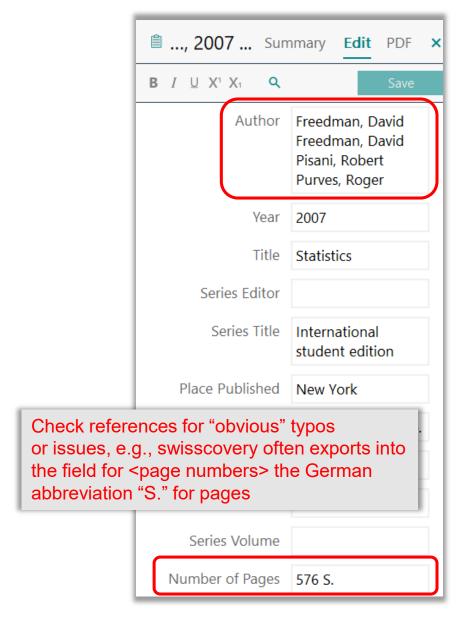

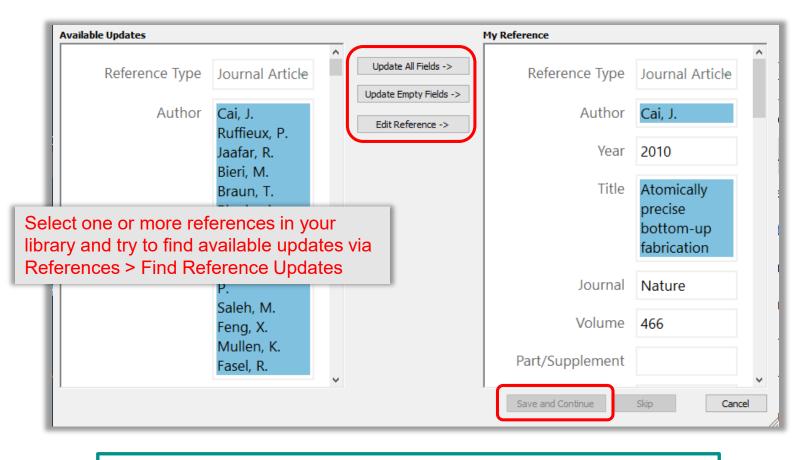

- Tip: Work with one library only and rather assign references to groups suiting your different purposes (eg your different papers, theses, ...
- Tip: One reference can be a member of multiple groups (no duplicates are created)

# Organising your Library – Checking & Updating References

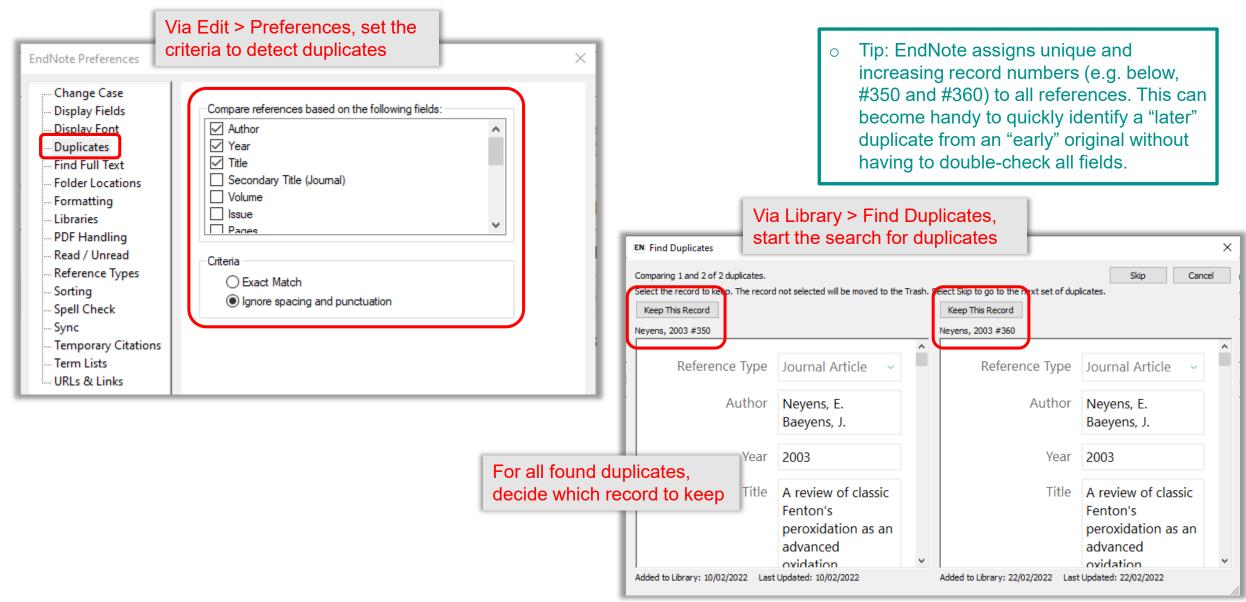

- Tip: If you don't want to update all or empty fields only; you can also just copy / paste individual fields via <Edit Reference> (requires to save manually).
- This tool is particularly handy for updating manually input and incomplete references

- Output styles determine how references will be formatted and displayed in your bibliography or in your text document
- EN's <Style Manager> provides >6000 styles (incl. demands for most journals)

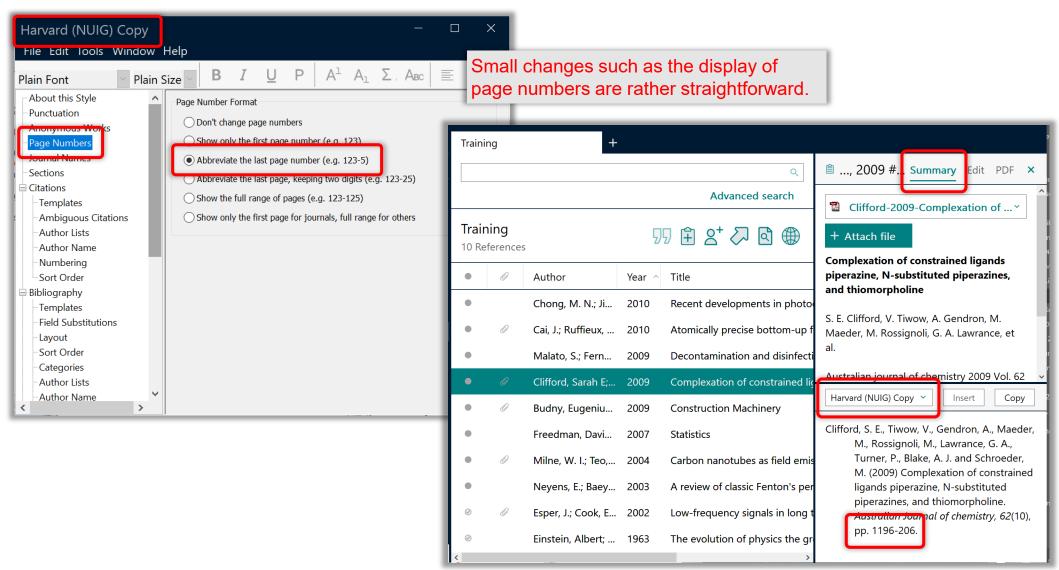

- With EN's <Style Editor> you can make many style adjustments effecting layout & formatting of all <reference types> (eg book, journal article, etc)
  - Tip: EN's style editor is very powerful and can require a fair bit of training to get used to the rules and special characters that effect the formatting of your citations/bibliography.
  - Tip: If you want to create/alter a style
    - Using EN's style manager, find & select the one closest to your liking and open it with EN's style editor
    - Save the style under a different name and tag it in the style manager as a favourite
    - Select the style in EN's main menu
    - Make changes to the style according to EN's help (F1) and observe the effects for a selected reference in the summary/preview pane of EN's main window (after saving)
    - EN's manual on modifying reference types and output styles (X8 but still ok)

# Cite-While-You-Write (MS Word Plugin)

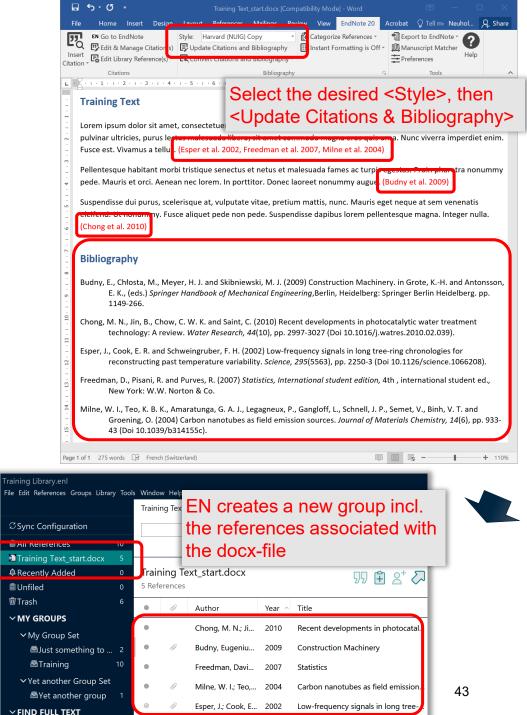

- EN's Word plugin acts as an interface between EN and MS Word
- Either use <Insert Citation> from within the Word document or drag'n drop selected citation(s) from EN to the desired position in the document
- By default, EN activates <Instant Formatting>, i.e. citations and bibliography are automatically formatted (or updated every 30sec) according to the selected <Style</li>
- Tip: Particularly if the document becomes rather large it is better to use the unformatted citations (via <Convert Citations and Bibliography>) and turn off <Instant Formatting> during the writing process.

# MLib4RI Cite-While-You-Write (MS Word)

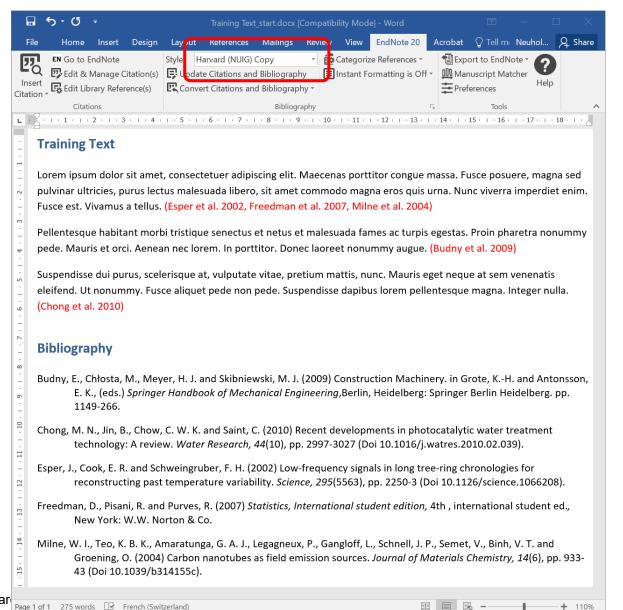

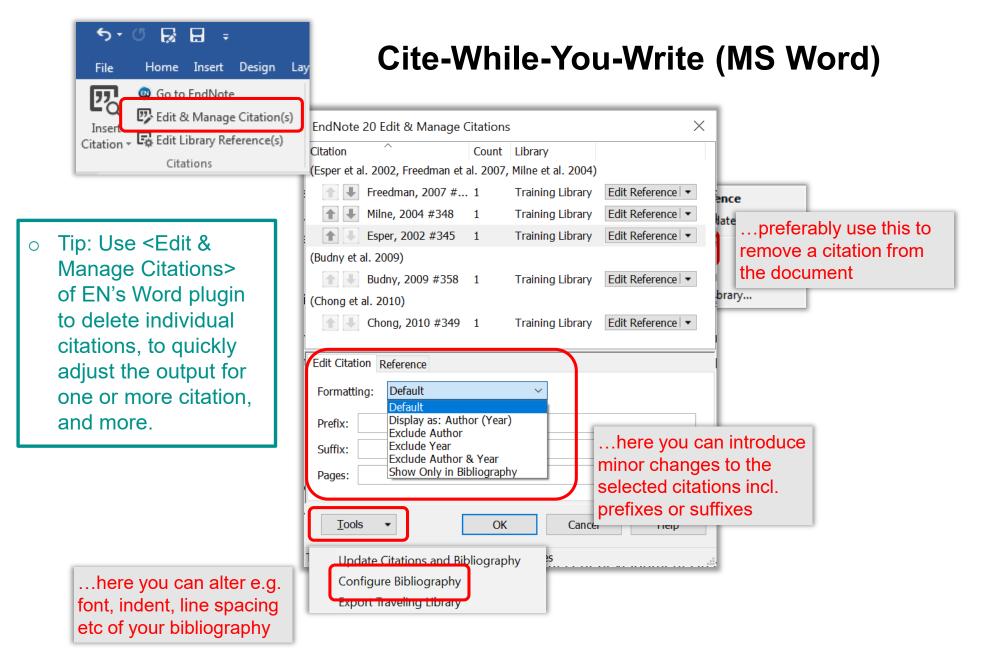

# Cite-While-You-Write (MS Word)

- Tip: Double-check if EN's output is according to your requirements (e.g. of the journal) or if there are any other issues (e.g. typos, missing or faulty field info)
- Tip: If needed, edit the output style to your satisfaction, save it to another filename (if needed), and <Update Citations and Bibliography> using the altered style

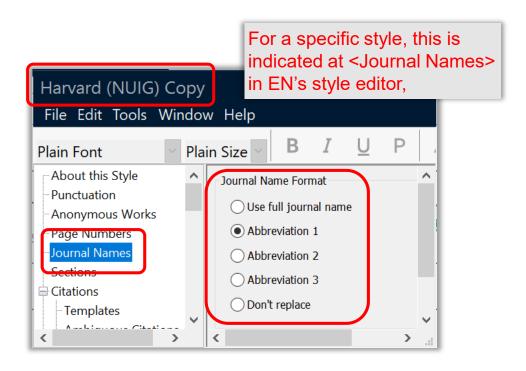

# **Cite – Using Journal Abbreviations**

 Some journals require the journal title to be abbreviated in the bibliography

 The full title and up to 3 abbreviations for journals can be defined in a so called journal <Term List>

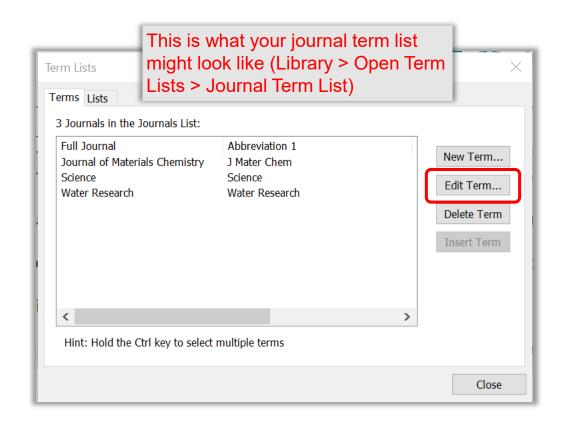

#### EndNote

- by default, copies the content of the reference field <Alternate Journal> as
   <Abbreviation 1> into a linked journal
   <term list>.
- allows the import of built-in journal<term lists> (ASCII files)
- allows to generate your own user defined journal <term list> (ASCII file)
- Method a) is the most straight forward one
  Method b) is particularly useful to save time
  with large amounts of citations
  Method c) might require lots of manual
  editing

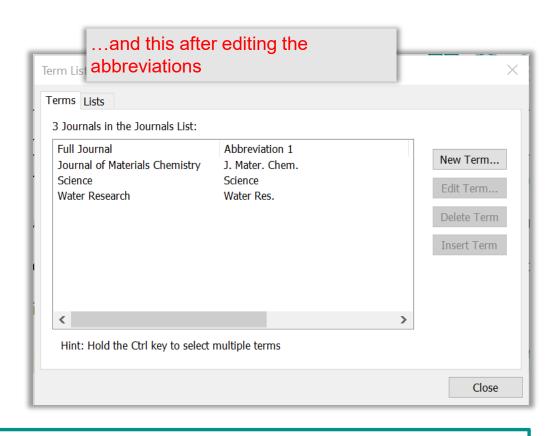

# **Cite – Using Journal Abbreviations (Method a)**

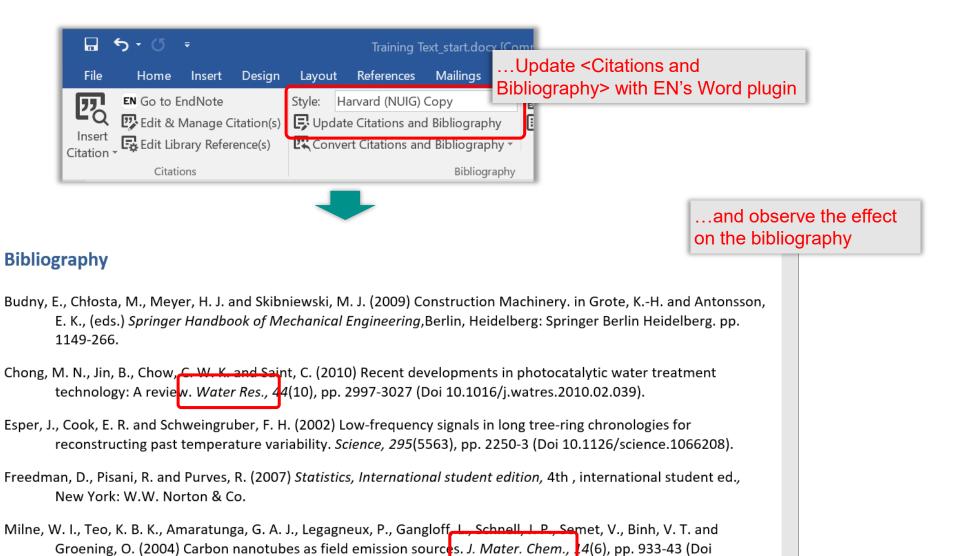

- Tip: If you are having troubles finding 'correct' abbreviations see
   <a href="https://www.lib4ri.ch/journal-directories-useful-websites#Journal-Title-Abbreviations">https://www.lib4ri.ch/journal-directories-useful-websites#Journal-Title-Abbreviations</a>
- Tip: Save your journal term list (\*.txt) for future use, expansion or simply as a backup

# **Sharing without an EN Online Account**

## **Sharing without an EN Online Account**

## Share your library (or groups thereof) by using EN's compress library feature

 The entire library or just groups incl. attachments can be compressed in one single file (refer to backup)

## Share your library via an institutional server

- Put your library on a shared server
- One person at a time has full access
- Note that this can corrupt your library if the server has an outage

## Don't share and sync your library via Dropbox and other Cloud services

 Your library will eventually become corrupted. This is NOT recommended by EndNote at all!

## Should your library get corrupted

 EndNote offers a repair tool with limited capabilities via Library > Recover Library

Share & Sync using your EN Online Account (Classic)

Open your EN 20/21

- Tip: Important Backup your library prior to enabling Sync
- Tip: Important Should you have an account with Clarivate Analytics (alerts with Web of Science, Researcher ID, etc), use your existing credentials to sign into EndNote Online
  - Tip: Only one single library can be synced (incl. attachments, no smart groups)

# Share & Sync using your EN Online (classic)

Your EN Online account will eventually contain all your references, attachments & groups (taken from all group sets). Depending on the size of your library upload/sync might actually take quite some time

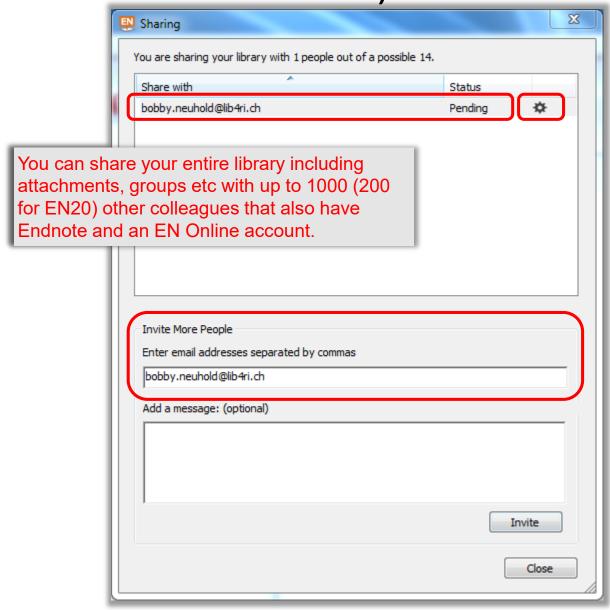

Endnote

Tip: If you like to sync this library with another device (PC, Mac or iPad), create a new library on that device, then enable and start syncing therein (max 3 for one account)

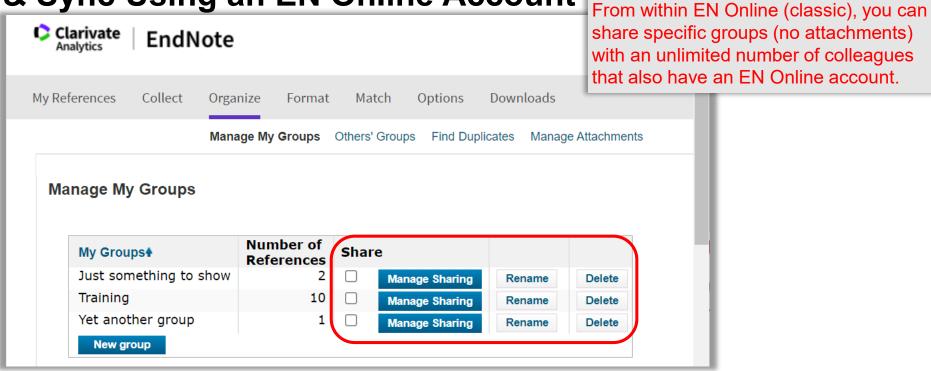

# Share & Sync from within Endnote (via your linked EN Online Account)

- After the invitee accepts your invitation (via e-mail) his sharing status <Pending> changes to <Member>; you can revoke the membership at any time via
- Read/write permissions can be defined for individual members of shared libraries.
- User changes are protocolled.
- Although EN 20/21 allow sharing of individual groups as well (right-click on the group > share group), the group will only be linked via an URL to EN Online (no attachments)
